Subject: I do not feel that Microsoft is getting any punishment at all!

how much money has microsoft given to the present white house administration??

the change of tone from this white house admin. concerning the punishment of microsoft is substantial. They aren't getting punishment at all!

The deal with providing schools with MS products is a scam, that only helps MS to grow their monopoly.

I only wonder how much did Microsoft "contribute" to the Bush administration to get such a light punishment.....
